

FIELD SERVICES

Heyl & Patterson Inc. has been providing advanced field services for more than a century.

Assembly of rotary dumper.

From emergency breakdowns, startup assistance and scheduled outages, to parts installation and training, our experienced professionals will help keep your equipment running while offering expert advice on the industry's latest technologies and concepts.

Whether you need consulting on parts installations, outage planning and assistance, maintenance recommendations, comprehensive upgrades, or startup assistance on new equipment, our field service engineers offer on-site mechanical, structural and electrical inspections with preventive maintenance programs—helping to extend the life of your machinery while maximizing efficiency, productivity and safety.

WHEN YOU CALL ON US, YOU CAN GET:

- Objective evaluations of existing equipment. Through formal on site Inspections, Engineering Studies and Upgrade Analysis, our recommendations on state-of-the-art tune-ups and maintenance adjustments will help you achieve peak operating efficiency. These disciplines can be Electrical, Mechanical, Structural or any combination.
- Our field service personnel are constantly apprised of the latest upgrades available for your equipment and their relative cost effectiveness. They can also discuss the experience of other users with similar applications.

Inspections during manufacture.

Pre-planning startups and major upgrades result in effective and efficient projects. Heyl & Patterson field service personnel work closely with our project managers on the specific and unique features of your project. We coordinate the most effective use of our various electrical, mechanical, and structural personnel to ensure your project is brought in on time and on budget.

Our experienced personnel have “been there and done that.” They have seen other installations with similar issues and can work with you to get your equipment up and running.

And, when it’s time to modernize your facility, our team will offer invaluable insight into the most cost effective strategies. We’re dedicated to being at the forefront of industry advancements and innovations.

Our phone answers 24 hours a day through our Emergency Hotline at 412 788-9811. The best person to address your specific need will contact you ASAP 24 hours a day.

Heyl & Patterson has been pioneering solutions for the materials handling industry since 1887—let us go to work for you. Go with a name you trust, a name with experience. For further information view our website at www.heylpatterson.com or call today!

- If you need information on price and availability of our replacement parts, equipment upgrades or new equipment, our field service personnel will coordinate with other Heyl & Patterson employees to provide the information you need.
- Engineered solutions to maximize production, minimize operating costs, reduce energy, reduce operating personnel and increase safety. Heyl & Patterson Field Service Personnel can help you achieve these goals.
